Introduction

Thank you for purchasing Catalyst for Hive. We hope you will enjoy playing these sounds and put them to good use in your music!

the u-he team

Installation

You can install Catalyst anywhere within Hive's 'Local' folder. Mac owners can use the extra 'User' folder as alternative location.

1) Load Hive and click on the PRESETS button to the right of the data display
2) In the ‘Directory’ panel, right-click on ‘Local’ and select ‘reveal in Finder’ (Mac) or ‘open in Explorer’ (PC)
3) Copy the ‘Catalyst’ folder into the ‘Hive’ folder you have just revealed
4) Back in Hive’s own browser, right-click on ‘Local’ again and select ‘refresh’

Note: Hive requires all presets to be in the following locations:

Windows: ‘Local’ (YOUR PLUG-IN PATH) \u-he\Hive.data\Presets\Hive\ 
Mac OSX: ‘Local’ MacHD/Library/Audio/Presets/u-he/Hive/ or ‘User’ ~/Library/Audio/Presets/u-he/Hive/
Playing the Presets

Performance Control

All Catalyst presets include realtime MIDI performance control via modulation wheel. The results of using this control are often subtle, but sometimes dramatic. Note that none of the presets in Catalyst require a keyboard with aftertouch capability.

The effect of the mod wheel in each preset is listed in Hive’s Preset Information panel (see Hive user guide, page 7). While auditioning presets, please make a habit of reading this, and always check out what the modulation wheel does to the sound.

About the author

Bass music ambassador and vintage gear aficionado Kabuki began his musical journey during the 1990s. Equally at home producing Hip Hop, Juke and Jungle, he is always looking for new fields of experimentation.

“With its thick oscillator tones, warm filters and extensive modulation capabilities, Hive is one of my go-to sound design plugins.

For the Catalyst soundset I chose presets from my personal library that I consider to be good creative starting points. My goal was to provide a palette of sounds that are not only immediately useful, but will also inspire users to experiment...”

– Kabuki
**Basses**
- Combustion
- Concussion
- Convex Squares
- Corroded Saws
- Folded Sines
- Fox Fire
- Grudge Match
- Half Now Half Later
- Headhunter
- Hook Up
- Jagged Edge
- Layer Cake
