## Patch Information

Please open Zebra's info field for valuable information about using these patches (click the *i*-button on the top right of the editor window). Most patches have various hints for playability and usage:

## Controllers:

BigTone's emphasize with this patch bank is on expression through common controllers such as Velocity, Aftertouch, PitchBend and Modwheel. The preset names indicate the main controllers by their endings, such as mw for ModWheel and pb for PitchBend.

If you need additional automation methods, we recommend to set up XY-Controls by right-clicking any knob and assigning it to one of the controllers.
